## ABOUT

In 2016 a colleague and I set out to [design a tool](#) to make it easier for our mission-driven clients to manage the systems that sustain their impact. This incredibly educational, challenging and rewarding experience opened my eyes to the world of software development and I haven't looked back. As a professional software developer I look forward to solving problems and tackling challenges for a company with the same passion, enthusiasm, and sense of humor that I approach the rest of my life with.
